Screening of the movie
“**Miles Ahead**” (USA, 2015)

“If you gonna tell a story, come with some attitude”

Miles Ahead is not just about the music. It's about what we all face at one time or another in our lives; questions about who we really are, what we have to say and how will we say it. How will we ultimately be defined and who gets to say so?

This movie tells the story of a few lost days in the life of Miles Davis, the virtuoso, fighter and genius, as he bursts out of his silent period, conspires with a Rolling Stone writer to steal back his music, and relives the years he had with his great love, Frances Taylor.
